CTR ANNUAL MEETING 2020

Placental-endometrial dialogue and pregnancy

6th and 7th July, Palmerston Room, St John’s College, Cambridge

Celebrating the achievements of Prof. Graham Burton, CTR Director

Photo credit: M. Turco
### Day 1: Monday 6th July

Day 2: Tuesday 7\textsuperscript{th} July

Session 3: Early placental development  
Chair: Steve Charnock-Jones, Department of Obstetrics and Gynaecology

9.00-9.30 Margherita Turco, Department of Pathology  
*Models to study early placental development*

9.30-10.00 Janet Rossant, University of Toronto  
*Making the trophectoderm lineage- key events leading up to implantation*

10.30-11.00 Myriam Hemberger, University of Calgary  
*Early placental development in mice and humans*

11.00-11.30 Coffee break, Foyer of the Divinity Building

Session 4: Pregnancy outcomes and beyond  
Chair: Theresa Powell, University of Colorado

11.30 – 12.00 Kent Thornburg, The Moore Institute, Oregon Health Sciences University  
*The placenta is the culprit*

12.00-12.30 Gordon Smith, Department of Obstetrics and Gynaecology  
*Identifying novel biomarkers for human placental dysfunction*

12.30-13.00 Eric Jauniaux, UCL  
*Oxygen modulates placental development like sound modulates fetal brain development*

13.00- 14.00 Buffet lunch in the College dining hall

Session 5: Environment and placenta  
Chair: Abby Fowden, Department of Physiology, Development and Neuroscience

14.00-14.30 Billy Yung, CTR  
*Placental unfolded protein response and pregnancy complications*

14.30-15.00 Erica Watson, CTR  
*Trans-generational effect*

15.00-15.30 Mike Nelson, Washington University School of Medicine, St. Louis  
*Trophoblast Injury and Repair, or Disrepair, in Human Placental Villi*
Session 6: New approaches to placental biology
Chair: Miguel Constancia, Department of Obstetrics and Gynaecology

15.30-16.00 Coffee break, Foyer of the Divinity Building

Session 6: New approaches to placental biology
Chair: Miguel Constancia, Department of Obstetrics and Gynaecology

16.00-16.30 Diana Bianchi, National Institute of Child Health and Human Development
Circulating nucleic acids as key markers of feto-maternal-placental health

16.30-17.00 Romina Plitman, University of Tel Aviv
Imaging and Modelling the Human Placenta

17.00-17.30 Anne Ferguson-Smith, Department of Genetics
Epigenetic inheritance and the placenta

17.30 Closing remarks by Charlie Loke, CTR
Since its inception in 2007, the Centre for Trophoblast Research has been at the forefront of placental and pregnancy research. With over 30 principal investigators, Next Generation Fellows and independent research fellows, the Centre has achieved numerous milestones and scientific breakthroughs during its history. This conference celebrates the extraordinary achievements of the Centre and of retiring director Prof. Graham Burton.
